PROFESSIONAL SUMMARY

Junior Flutter Developer and Software Engineer (B.Sc. Computer Science) with 1+ year of professional experience building production-ready cross-platform Android and iOS applications with Flutter and Dart. Published 2 apps on the App Store and Google Play. Strong in BLoC/Cubit and GetX state management, Clean Architecture, MVVM, Firebase, Supabase, RESTful APIs, and real-time features with SignalR. Skilled in debugging, refactoring, and code review, and experienced in AI-assisted development: agentic coding workflows, plan-first implementation, and reviewing AI-generated code. Graduation project graded A+.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter SDK, Flutter Web

State Management: BLoC, Cubit, GetX

Architecture & Patterns: Clean Architecture, MVVM, MVC, Feature-Based Architecture, Repository Pattern, Clean Code

Backend & APIs: RESTful APIs, Dio, JWT Authentication, Firebase (Authentication, Firestore, Realtime Database, Cloud Storage, Cloud Functions, FCM), Supabase, SignalR (WebSockets)

Local Storage: SQLite, SQL, Hive, Shared Preferences

App Features: Push Notifications (FCM), Local Notifications, Material Design, Apple Human Interface Guidelines (HIG), Responsive UI, Localization (Arabic/English), Theming, Payment Integration, Biometric Authentication, WebView, Unit Testing

AI-Assisted Development: Agentic Coding, AI Rules & Skills, Sub-Agents, Session Context Management, Plan-then-Implement Workflow, AI Code Review

Tools & Practices: Git, GitHub, CI/CD, Agile, Branching Strategies, Code Review, Debugging, Refactoring, Postman, Android Studio, VS Code, Figma

WORK EXPERIENCE

Flutter Developer (Full-Time) | Designinsta 12/2025 – Present

- Develop and maintain cross-platform Flutter applications, implementing features and handling bugs and technical issues in production.
- Collaborate with my team to deliver features, troubleshoot issues, and maintain code quality.
- Use Flutter, Dart, GetX, and Firebase to implement application features and maintain existing functionality.

Flutter Developer (Intern) | Designinsta 09/2025 – 12/2025

- Gained my first professional software development experience, working with a team to deliver Flutter features and complete assigned tasks.
- Learned Agile workflows and team collaboration using Jira, Git, and GitHub, including task tracking, branching, and pull requests.
- Implemented Flutter features under mentorship while learning professional coding practices and project workflows.

PROJECTS

Muzakkir (مُذكّر) – Habit Tracker & Reminder App Published on Google Play

Flutter, Dart, Cubit, Local Notifications, Local Storage

- Developed a habit tracking and reminder app that helps users organize daily habits, manage tasks, and maintain consistency with their goals.
- Implemented customizable scheduled notifications and local data storage to manage habits and reminders without requiring user accounts or a backend.
- Published the app on Google Play, gaining hands on experience with release preparation, app signing, and the deployment process.

Qatra (قطرة) – Water Donation Platform Published on App Store & Google Play

Flutter, Dart, GetX, Firebase, Payment Integration

- Developed a Flutter app that lets users purchase water and donate it to mosques, with delivery guaranteed within 24 hours.
- Integrated secure online payments using Moyasar and built real-time delivery tracking.

Qatra Captain (كابتن قطرة) – Delivery Driver App Published on App Store & Google Play

Flutter, Dart, GetX, Firebase

- Built a dedicated driver app for managing water deliveries, letting captains view and process assigned orders in real time.
- Implemented an order workflow with full delivery details and status tracking (pending, in progress, delivered).
- Added media verification so drivers can upload photos and videos as proof of delivery.

Farm IQ – Smart Cattle Management App | Graduation Project (A+)

Flutter, Dart, GetX, RESTful API, SignalR, FCM, Dio

- Built a role-based (Admin/Worker) farm management app with real-time cattle health monitoring, live telemetry charts, and automated critical/warning alerts from an AI analysis backend.
- Implemented a live team chat with SignalR (typing indicators, online presence, @mentions) and JWT authentication with automatic token refresh via Dio interceptors.

Smart Label – E-Commerce App | College Project

Flutter, Dart, BLoC/Cubit, RESTful API, MVVM, Clean Architecture

- Designed and built a full e-commerce app with product browsing, cart management, and instant price updates.
- Integrated an admin dashboard for product and order management through RESTful APIs.

Basmty – Employee Attendance Tracker | Freelance

Flutter, Dart, Biometric Authentication, Local Network, SQLite

- Built a mobile app that records employee check-in/check-out using fingerprint authentication over a local network.
- Enforced local-network-only communication and secure handling of biometric data.

CERTIFICATIONS, TRAINING & EVENTS

- **AI for Developers: Master Agentic Coding the Right Way** – Udemy (Instructor: Tharwat Samy)
- **Flutter Training** – Information Technology Institute (ITI), 07/2025 – 08/2025: responsive Flutter UIs, Cubit (BLoC), Hive, Firebase Auth, Firestore, FCM, REST APIs, WebView.
- **iSUPPLY Hackathon 2.0** – 06/2025 – 07/2025: added real-time order tracking and FCM push notifications, plus a full order status lifecycle (Pending → Confirmed → Shipped → Delivered).
- **Next Summit** – iCareer 2026, attended.

EDUCATION

B.Sc. in Computer Science | Tanta University, Egypt 09/2022 – 06/2026

GPA: 3.44 / 4.0 (B+) | Graduation Project: A+

LANGUAGES

Arabic: Native **English:** Professional working proficiency
